

Team Training & Internal Expertise

Uplevel your team's scientific fluency

What I Offer

You've got smart people—let's make sure they're equipped to communicate like it. Whether you're training clinicians, researchers, or program staff, I offer tailored workshops and internal consulting that build clarity, confidence, and communication power.

I translate science into strategy, helping your team connect with diverse audiences, avoid jargon traps, and deliver impactful messages from the inside out.

→ **Science Communication Bootcamps**

Custom workshops that build confidence in explaining research to patients, funders, and media—without oversimplifying.

→ **Audience-Focused Messaging**

Training your team to shift from "what we want to say" to "what our audience needs to hear" using real-world examples and roleplay.

→ **Internal Resource Toolkits**

Development of reusable guides, templates, and messaging banks for consistent communication across departments.

→ **Inclusive Communication Practices**

Workshops that emphasize accessibility, cultural awareness, and empathy in messaging—because inclusivity begins inside your organization.

Ideal For

- **Healthcare organizations** training providers to communicate complex topics with clarity and empathy
- **Research institutions** looking to improve how scientists share findings with public, media, and funders
- **Nonprofits and advocacy groups** wanting consistent, inclusive messaging across teams and programs
- **Biotech or pharma companies** aiming to align internal teams around patient-centered language and strategy

Why Work with Me

With experience across research, patient advocacy, and communication, I translate complex science into approachable, actionable insights. I design engaging trainings that build internal expertise, empower your team, and align your work with the people it serves.

Contact

Let's explore how my strategic insight can support your next big move. Email me or schedule a discovery call—and let's move your mission forward, together.
